Hotel

PROGRAM FOR OCTOBER 1, 2019

JIM PERRIER

UNIVERSAL DATA INC.

Jim Perrier founded Universal Data, Inc. in 1982, he had a vision that as technology changed, so would they. He continues to believe that if they focused on the solutions and relationships with their customers and treat them equally; each with dignity, courtesy and honesty, success will follow.

Universal Data is a strategic partner that will help you plan for today and tomorrow. Keeping up to date on the latest technologies and protocols can be a challenge. Their team can provide you with information about relevant IT changes.

Security breaches have become so commonplace that “when” has replaced “if” in the language of preparation for the next one. Since the average cost of a breach has risen to almost \$4 million, your wallet (and your reputation) can't afford it, we believe the best way to ensure your IT Security posture remains strong is to be proactive. We help you address your organization's current security, acquire a successful security design and seamlessly adopt a security solution that fits your needs. Once in place, we can help continue to monitor your security position and recommend corrective action, when necessary. We can even train your employees so they act as another security layer in your network.

More than ever, employees are the weak link in an organization's network security. They are frequently exposed to sophisticated phishing and ransomware attacks. Employees need to be trained and remain on their toes with security top of mind.

UPCOMING ELECTIONS

GNOEA will be holding elections for three board members in the month of November. If you have been in GNOEA for one year, you can serve on the next term of the board of directors. Please contact me if you are interested at susan@gnoea.com.
